Warehouse Management System 5448 Project. Part 2 Individual

Max Hollingsworth March 14, 2017

### Requirements

I have use cases 8, 10, 11, and 12. The table below shows a mapping from the use case to the requirements they cover. "U" requirements are the functionality requirements and "S" requirements are the stretch requirements.

Use Case	Requirements
UC-08: Fetch Product from Shelves	U-01, U-03, U-04, U-24,
	U-26, U-29, U-30, U-31,
	and U-49
UC-10: Place Order	S-04, S-05, S-06, S-08,
	S-09, S-10, S-11
UC-11: Edit Order	S-04, S-05, S-06, S-12
UC-12: Cancel Order	S-04, S-05, S-06, S-12

# **Use Cases**

# Use Case 08

<b>Use Case ID:</b>	UC-08
Use Case	Fetch Product from Shelves
Name:	
<b>Description:</b>	The Management System is notified of an order and a
_	Retrieval Robot is sent to move the product from the shelf
	to the Packing Center.

Actors:	Packing Center, Retrieval Robot, Order System			
Pre-	An order is placed in the Order System. Order System			
conditions:	divides orders into products and quantities. Product must be			
	in st	tock. At least one Retrieval	Robot must be idle.	
Post-	The	correct quantity of the pro-	duct is in the Packing Center	
conditions:	awa	iting shipment.		
Frequency	Pote	entially non-stop.		
of Use:		7		
Flow of		Actor Action	System Response	
<b>Events:</b>	1	Order System notifies	System alerts the RetBot of	
		Management System of	the product and quantity.	
		product and quantity to	System updates UI to	
		move.	show RetBot is Busy.	
	2	RetBot notifies System	System updates the UI to	
		and Packing Center	show that RetBot is idle.	
		that product has been	System updates model and	
	moved. database with new			
			inventory count.	
	3	Packing Center makes		
	3	product ready for		
		shipment, then ships		
		product.		
	product.			
Variations:	2. If a RetBot Failure occurs the Warehouse Manager is			
	notified.			
<b>Exceptions:</b>	Location of the product is inconsistent with the database;			
	Inventory Manager notified.			
Developer	None			
Notes:				

Use Case 10

<b>Use Case ID:</b>	UC-10
<b>Use Case Name:</b>	Place Order
<b>Description:</b>	Customer or Customer Service Rep places an order.

Actors:	Cus	tomer Customer Serv	ice Ren	
	Customer, Customer Service Rep			
Pre-	Order System knows quantity of in-stock products.			
conditions:				
Post-	The	order is divided up in	to products and quantities which	
conditions:	are s	are sent to the Management System for filling.		
Frequency	Pote	Potentially non-stop.		
of Use:				
Flow of		Actor Action	System Response	
<b>Events:</b>	1	Customer or	System notifies Customer if the	
		Customer	order is currently in-stock. If	
		Service Rep	in-stock order is sent to the	
		places an order	Management System. If not the	
		of products and	Customer is notified that	
		quantities.	product is out-of-stock.	
Variations:	Non	ie		
<b>Exceptions:</b>	Non	ie		
Developer	Non	ne		
Notes:				

# Use Case 11

<b>Use Case ID:</b>	UC-11	
Use Case	Edit Order.	
Name:		
Description:	After a customer order has been placed a Customer	
	Service Rep can edit the order.	

Actors:	Customer Service Rep		
Pre-			
conditions:	ship	ped. The customer h	as alerted the Rep of an order
	chai	nge.	-
Post-	Order edited and customer notified.		
conditions:			
Frequency	Potentially after every order.		
of Use:			
Flow of		Actor Action	System Response
<b>Events:</b>	1	Customer	System notifies Rep if it is too late
		Service Rep	and the product has already
		edits an order	shipped. If not too late, the
		in the Order	system sends updated order to
		System.	the Management System.
Variations:	None		
<b>Exceptions:</b>	None		
Developer	None		
<b>Notes:</b>			

# Use Case 12

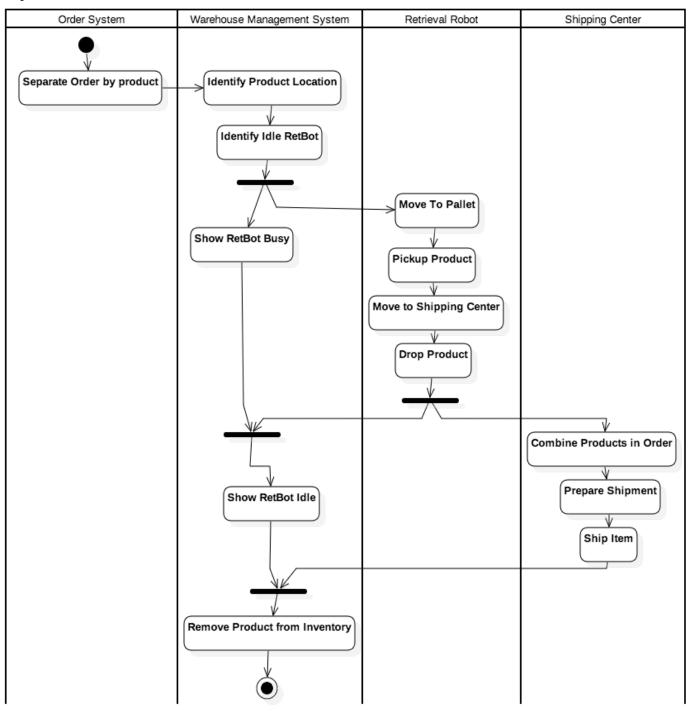

<b>Use Case ID:</b>	UC-12	
Use Case	Cancel Order	
Name:		
Description:	: After a customer order has been placed a Customer	
	Service Rep can cancel the order.	

Actors:	Customer Service Rep			
Pre-	A customer has placed an order and products have yet to be			
conditions:	shipped. The customer has alerted the Rep that they wish to			
	cano	cel the order.		
Post-	Order in returned to shelves and the customer is notified.			
conditions:				
Frequency	Potentially after every order.			
of Use:				
Flow of		Actor Action	System Response	
<b>Events:</b>	1	Customer Service	System notifies Rep if it is too late	
		Rep cancels the	and the product has already	
		order in the	shipped. If not too late, the	
		Order System.	system sends cancel notification	
			to the Management System.	
Variations:	None			
<b>Exceptions:</b>	None			
Developer	Non	ie		
<b>Notes:</b>
